

CVT Mission

Provide Veterans with the right care, at the right place, and at the right time.

CVT Vision & Values

We want to provide our Veterans with the most convenient and high quality healthcare possible.

CVT aims to make the local community the preferred place of care whenever possible by bringing the best care to you.

Trained healthcare providers are using health information technology to securely and sensitively deliver care and promote healing relationships.

Clinical Video Telehealth (CVT)

Bringing the Best

Care to You

What is CVT?

Clinical Video Telehealth (CVT) uses video conferencing technology to conveniently, securely, and quickly provide Veterans with access to health care services from remote facilities.

CVT instantly connects a Veteran in one location with a healthcare provider in a different location. This connection allows for real-time interaction between patient and provider.

Specialty equipment provides a safe, reliable, and accurate way for providers to assess a patient and manage their treatment without physically being in the same location.

What is CVT like to use?

CVT appointments feel a lot like traditional face-to-face appointments.

When you come to your scheduled appointment, a staff member will escort you to the CVT equipped room.

The television monitors and cameras will be set up so that you and your provider can both see and hear each other clearly.

When your visit is over, you will let the staff know your session is complete. If a follow-up appointment is needed, you will go to scheduling to set up your next appointment.

Why Should I use CVT?

Clinical Video Telehealth (CVT) helps you access the best healthcare without having to make long trips to see a specialist in person.

Using advanced technology, our doctors can provide you with the care you need by CVT as effectively as they can with a traditional face-to-face appointment.

Clinical Video Telehealth is:

- ◆ Safe
- ◆ Secure
- ◆ Effective
- ◆ Convenient

CVT Services

CVT is a rapidly expanding option for quality and convenient care.

Contact your local telehealth coordinator to learn about these and other telehealth services available in your area.

Upcoming CVT Services Include:

- ◆ Sleep Medicine
- ◆ TeleMove
- ◆ TeleGI
- ◆ CVT to Home
- ◆ TelePsychology

“TeleMental Health saves time, money, and the hassle of driving in traffic.”
--Robert Cameron, Veteran
